**ПРАКТИЧЕСКАЯ РАБОТА №4.
СРЕДА РАЗРАБОТКИ REMIX IDE**

Преподаватель: Саиф Муджахед Абдулла Хаель

Студент: Кисляков Максим Вячеславович

Группа: РИ-330936

Екатеринбург 2026

Компиляция контракта Storage.sol

Деплой

Storage.test.js

Запуск теста tests/Storage_test.sol

Компиляция и деплой 2_Owner.sol

Тест: owner.test.js

Компиляция и деплой 3_Ballot.sol

The screenshot shows the Remix IDE interface. On the left, the 'Deploy & Run Transactions' panel is open, showing the 'Ballot' contract selected for deployment. The main editor displays the Solidity code for 3_Ballot.sol, which includes functions like `winningProposal()` and `winnerName()`. The bottom panel shows the 'Explain contract' section, which displays a transaction log with a green checkmark indicating a successful deployment.

Ballot_test.sol

The screenshot shows the Remix IDE interface. On the left, the 'SOLIDITY UNIT TESTING' panel is open, showing the 'BallotTest' test selected. The main editor displays the Solidity code for Ballot_test.sol, which includes test functions like `checkWinningProposal()` and `checkWinnerName()`. The bottom panel shows the 'Explain contract' section, which displays a transaction log with a green checkmark indicating a successful test run.

Компиляция и деплой contracts/4_VendingMachine.sol

The screenshot shows the Remix IDE interface. On the left, the 'Deploy & Run Transactions' panel is open, showing the 'VendingMachine' contract selected for deployment. The main editor displays the Solidity code for 4_VendingMachine.sol, which includes functions like `constructor()` and `getVendingMachineBalance()`. The bottom panel shows the 'Explain contract' section, which displays a transaction log with a green checkmark indicating a successful deployment.
